Wheat In Canada

WESTERN CANADA has long been famous for the production of a large amount of wheat in the world. The first crop was sown by the Selkirk settlers, who came from Scotland. In 1882, Lord Selkirk's Farm Factory in 1814 to colonize land secured by Lord Selkirk from the Hudson's Bay Company. As the West was settled and transportation facilities were developed the annual wheat crop increased steadily. In the year 1840 it was estimated that 6,000 bushels were sown in wheat. By 1880 the crop was up to 1,000,000 bushels. The wheat crop in Western Canada continued to rise until the present time, when they have reached the hundreds of millions. The soil and climate of Western Canada are favourable for growing the finest quality of wheat in the world, but there have been obstacles to overcome in the form of rust, insects, frost and numerous other difficulties.

Obstacles Have Been Overcome

These, and other factors which have interfered with the success of wheat growing here have been eliminated or overcome through the efforts of farmers and others interested in the future of agriculture. Outstanding contributions made to the success of this work are the findings of Dr. Wm. Saunders, the first Director of the Dominion Government Experimental Station at Ottawa, and his two sons, C. M. and A. P. Saunders. Through their efforts Marquis wheat was developed, and Marquis wheat, a new variety, which was ready for market before its time, was sown in 1909. This and many other such discoveries have helped to make the wheat crop from the Prairie Provinces one of the foremost Canadian industries and an important factor in world food supplies both in peace and war.

During the past few years, farmers on the Prairies have been encouraged to produce hogches rather than wheat, to meet the needs of Britain and other countries whose normal sources of supply had been cut off because of the war. Hog production was sharply increased to enable Canada to meet her obligations for food imports, but the figures issued by the Dominion Government show that the Western farmers are now returning to wheat, their surer and most satisfactory crop. In Saskatchewan the acreage sown in wheat this year was three per cent, higher than in 1944, and in Alberta was by a little more than one per cent. The acreage sown in wheat in the West, which was planted, but the acreage sown in other grain crops was higher. In all three provinces hog production showed a marked decline. Nutrititionists and others concerned with food supplies at the present time do not view with concern these indications that wheat is once more to be Western Canada's largest crop, for they are of the opinion that during the next few years there will be need for all the wheat which can be produced to meet the world's requirements.

The Wool Clip

Western Canada Shows Marked Improvement This Year

According to the latest reports, the 1945 domestic clip of Western Canada shows a marked improvement over 1944 in the preparation of individual fibres for spinning. The Current Review of Agriculture, October 1945, Canada, The Bright grades come mostly from British Columbia and Manitoba, where more than 90 per cent of the moisture played a major role. Saskatchewan and Alberta domestic wools appear to run more to the bright side, due to the lower earth content and consequent lower yield. However, after scouring, the bright side is comparable with the bright side.

Eastern domestic wools will probably grade better than in 1944, with a somewhat lighter shrinkage, says the Review.

The total weight of fleece wool graded in registered wool warehouses in 1944 amounted to 10,553,243 lbs., an increase of 167,441 lbs. over 1943.

GEMS OF THOUGHT

FORTITUDE

Fortitude I take to be the quiet possession of a man's self, and an undisturbed doing his duty whatever evil besets, or dangers lie in the way.

-J. L. LEWIS

Let us have faith that right makes might, and in that faith let us dare to do our duty as we understand it. —Abraham Lincoln.

Our great lawgiver, steadfast to the truth, in obedience to God's laws, demonstrated for all time and peoples the supremacy of good over evil, and the supremacy of Spirit over matter. —John Baker St. John.

Let us not weary in well doing; for in due season we shall reap, if we faint not. —Galatians 6:9.

There is a strength of quiet endurance as a signpost of courage as the most effective way to prowess. —Henry Theodore Tuckerman.

A man may fall into a thousand perplexities, but if his heart be upright, his head clear, his conscience true, he will find a way through them without dishonor. —Robert Louis Stevenson.

SMILE AWHILE

Father: "Well, Pat, have you counted all the sheep?"
Pat: "Yes, sir, and except one, but he ran around so much I couldn't count him."

"See this stickin'? Well, it once belonged to a millionaire." "And who is the millionaire?" "Me, sir!"

"Boy, I'm sorry, I just got a letter from a man telling me he'd shoot me if I didn't stay away from his daughter."

"Yeah, but all you have to do is stay away from his daughter."

"Yeah, but he didn't sign his name."

"Do your husband always live up to his promise of his wedding day?"

"Always, those days he said he was not good enough for me, and he has been proving it ever since."

A raw recruit had had a real good sleep down in a young lieutenant's bunk. "I wonder if you sauntered up to the lieutenant without saluting," he was told.

"Well, I didn't say 'yes' when you asked me if I wanted to salute the lieutenant without saluting."

"I wonder if you sauntered up to the lieutenant without saluting," demanded the officer. "Well, sir," said the rookie, "I thought you were still cross with me."

A high-tension wire was charged with electricity and with having stepped on his truck so suddenly that a car behind him smashed him to bits. The bridge across him who did not help him back.

Pat immediately answered: "If the poor fool couldn't see me truck, how in Hivin's name could he see me hand?"

A visiting speaker to an organization he was called upon to address, when asked, "What do you think?" replied, "I think it's to be factual."

He asked this question: "What would you do before so many bright boys and girls come along?" "I think if you had nothing to say?"

A small boy spoke up: "I'd keep quiet."

A visiting speaker to an organization he was called upon to address, when asked, "What do you think?" replied, "I think it's to be factual."

He asked this question: "What would you do before so many bright boys and girls come along?" "I think if you had nothing to say?"

The world's largest exporter of coffee is Brazil.

Price Control And Rationing Information

Q.—I have just returned from overseas and am on thirty-day leave. I have no ration coupons left for all rationed foods, except meat. Now that meat cannot be rationed, will I be able to buy meat coupons for meat?

A.—Yes. Meat coupons will be issued to service personnel on leave by the local ration boards while returning from overseas, subject to meat rationing. You must present your ration card when making application for these coupons.

Q.—Must beef rings register with the local ration boards? A.—All beef rings must register as such with the local ration boards. All regulations controlling their operations will be given to them when they apply.

Q.—How often do meat coupons become valid?

A.—Meat coupons will become valid every Thursday and will remain valid until otherwise declared.

Q.—My husband is expected home overseas next month. Can I get him a ration coupon for him to use when he comes home? I have no ration book for the winter when he will be home?

A.—Yes. If your husband is due to return from overseas next month, you can apply for a ration book before October 31st, 1945, 20 additional preserves coupons will be issued to him in his ration book 5.

Please send your questions or your request for pamphlet "Newspaper News" to the Bureau of Information, Department of National Defence, Ottawa, Ontario, and keep your name and your ceiling price, mentioning the name of this paper to the nearest War-time Prices and Trade Board office in our province.

Showed Their Loyalty

People of Northern Ireland Played Important Part in War

Northern Ireland continues to function, notwithstanding all the will and deviousness of its enemies, and the Province has shown a high degree of loyalty in the war with Germany, now victorious.

M. Winston Churchill, former British Prime Minister, has paid tribute to the people of Northern Ireland, who have been rendered unable to do their share of the work in combatting the submarine menace.

The Royal Ulster Constabulary, in cities 1941 bore witness to the Nazi recognition that the Royal Ulster Constabulary was among the most reliable and courageous in Europe. The constabulary and resolution of the Province has remained unshaken under the Nazi occupation.

Her loyalty has not wavered or dimmed with the passing of the years.

—Belfast Telegraph.

To the man a teller might have shot me if I didn't stay away from his daughter."

OUR COMPLETE SHORT STORY—

GULLIBILITY

By JACK WOODFORD

McClure's Newspaper Syndicate

They were somehow vagueness alike, the enormous sea and the enormous sun, the enormous gull. The gull, which Mike called Gull, was big as an eagle and twice as tough. The two hated each other with a rich, full-bodied venom.

The bird hated Mulvane because she was an enormous gull apparently, and because that day he had been taken from her master. And Mulvane hated the bird because he had been forced to accommodate a gull when he'd had his heart and the slip of the bird caused that day had cost him his position.

Mike, who figured, had also cost his wife, Ellen. Flannagan wouldn't live in the same house with a sea gull.

One of the gull's wings was broken. The bird lived on the back porch, which Mulvane had encased in chicken wire. Taking Gull out and letting him loose in the world was like letting a man loose in the ocean. Gull had made for her was some job. He had to wear thick gloves and a baseball catcher's mask to account for his wing.

On a Saturday night when Mulvane had about given up hope, what he had been waiting for all day happened.

He'd taken the gull in her box out to a game at the local Oak Park.

There was there that Gull for the first time made a sound of affection and recognition that was unmistakable.

Mulvane quickly opened the box, and Gull went straight for a poock-marked hoodlum, uttering rasping cries of brotherly love. The love was mutual. Mike shuddered and caught the tough's gun arm tight, as he sat in the square room. Gull,

the crook's name turned out to be Aclkin. When they offered to put the gull in the cell block, Aclkin confessed. Aclkin didn't deny that he was the gull's first boy friend, but he did say that he'd been shot after that shot. Now it was Mike and Mike only with Gull—much so that Mike blushed and squirmed when she addressed against his head in the square room.

Vegetable Oil Plant

Project For The Utilization Of Farm Products

Contract for the erection of a vegetable oil plant at Saskatoon as a part of the \$500,000 Wheat Pool project for the utilization of farm products, has been awarded to the Canadian Brothers and Sons, Saskatoon.

The plant, to be located on a 21-acre site in Saskatoon's industrial area, will have a capacity of 100,000 bushels of wheat annually, will include a 1,000-barrel modern flour mill, a glycom plant, a factory for making margarine, glucose and syrup from wheat and a \$100,000-bushel grain storage elevator.

DESTRUCTION BY JAMS

Hudson's worth millions of dollars and machinery for rubber processing have been laid waste in Malaya by the Japanese, while the tin industry, which had been seriously impaired by the London Daily Sketch report in a dispatch from its correspondent in Kuala Lumpur, Federal Capital, was still intact.

Mr. Sinclair recently visited the area and states that three carloads of aluminas were shipped to Bay Junction to Mincow, returning, the local growers

BY JIM GREENBLAT

evidently, was no gal to go on singing, and the gull was hating him. The gull was bent on getting him. The gull had been here a long time before that day. So I figures no gull with a busted wing had few to Stale and few to tell. The gull was a mean guy brought it there, known' that at the busiest corner in the world the biggest gull ever seen walked right up to him. The gull was determined to jam up everything—so while I untangle the crowd and catch the bird the guy can't get away. The gull is I figures no guy could or get it there. I figures the bird was a mean guy brought it there. So I starts checkin' croaks systematically.

"One way or another, Mulvane, it was nice work, shall report you for a short time at once."

"Thanks," said Mulvane saluted and went out. Straight to Ellin. By this time, it knew he was the perpetrator of the daring daylight robbery on State Street; how he'd get the love of his life, the Jewish Association, to help him out.

Aclkin had stayed a long time cold-feeding off from a former job out in the middle of a boat, and had found the gull there.

"Mike tell me right off before we get any further," Ellin insisted, "what becomes of that razor-bladed fowl?"

"I'm keeping it," Mike said firmly, "but I told you I was happy if your life would be when you shoot it down, but I'll let you know when I've got it."

"Look, Ellin, I agreed to let you old lady live with us, didn't I?" Mike interposed.

"It ain't the same thing—my old lady don't eat or scratch, or yell. You ain't keepin' it, and me, Mike Mulvane."

"Now look, Ellin, I'm gonna get you off this," Mike said firmly, "I don't like gulls, and there ain't another in the world, except Gull, tough enough to get along with me, except you."

"'Course!" he said in a way he'd heard it said on the radio, right before the damn man decide between the young American and the guy with a German accent.

Dejectedly Mike went home. All he had to do was to get the gull off the porch, and his position. Mike sighed so slightly it rattled the windows. And in the phone ring, he'd say, "Mike, I'm gonna get you off this, Ellin, I agreed to let you old lady live with us, didn't I?" Mike interposed.

"It ain't the same thing—my old lady don't eat or scratch, or yell. You ain't keepin' it, and me, Mike Mulvane."

Town & District

Born to Mr. and Mrs. Tom Brown a girl on Sept. 22nd.

Miss B. Jenkins of Calgary was a visitor at the home of Miss R. James during the week end.

Mrs. E. Gooderham left on Monday morning for Vancouver where she will attend the university in that city as master of ceremonies.

Donald MacArthur, R.C.M., arrived home during the weekend on discharge leave. He has been posted in eastern Canada for sometime past.

S. Hampton spent Monday in Calgary attending a wedding. Stuart is in great demand for weddings in the capacity as master of ceremonies.

The United Nations clothing drive will be sponsored in this district by the Red Cross from October 1st to October 15th. You can help by giving your bundles or you can leave them at the town office.

Good news follows and others intensified. A newspaper dispatch from the east says a ship has just landed at an eastern port with almost a million barrels of Scotch whiskey. O, boy!

Mrs. Johnny Webb and Miss G. Deshayes of Calgary spent the weekend in town visiting at the home of latter's parents Mr. and Mrs. J. Deshayes.

Donald Farquharson and his cousin F. O. Gordon Dunn of Calgary spent the weekend in town at the home of the former's parents Dr. and Mrs. M. Farquharson.

"Hogan," the school can driver last seen driving a well earned half-holiday during the past week. Owing to the muddy side roads his van had not been able to "navigate" them consequently he and the boys and girls in the country, who attend school in town are vacationing.

Al Wilson Gleichen's star fisherman spent all of last week fishing west of Calgary. He had good luck. His total score shows he caught 49 pounds of trout.

Mr. and Mrs. L. A. Pifer, of Portland, Oregon, were visitors to town for a short time. They came up from the States to attend the funeral of Mrs. Pifer's mother, Mrs. W. R. Payne, which took place in Calgary Saturday afternoon. While in town they met as many of their old time friends as their limited time would permit. They were here for a short time about a year ago.

Mr. and Mrs. C. T. Taylor and young son Bill of Okotoks are spending a few days in town visiting relatives. While here Bill is having the time of his life plowing through the mud hunting for the wily gophers. He succeeded in getting one Monday.

And one of the ways of making a better world will be to invest in Victory Bonds. That's all we can say. We've supported previous loans with a will and we're asked to put our shoulders to the wheel again... but this time with reconstruction as our goal. The ninth loan will be launched Oct. 22 for \$1,500,000,000. Hon. J. L. Ilsley Minister of Finance, notes that previous financial loans have aimed to cover the financial needs for only a short time, but the present loan, because of a reduction in Canada's war costs, the ninth loan will meet borrowings for a twelve month period. We've loaned to bring peace and now let's loan to make that peace effective.

(Continued from page one)

World Food

grades. There is need for improvement in type and finish. Improvement in type can only be brought about through the consistent use of good sires and better finish by means of marketing more grain in the form of feed.

Good breeding, proper feeding and the use of convenient equipment are factors which we must stress in the development of our beef and dairy enterprises. In many cases in the past a shortage of money has made it difficult to buy good sires or install labor saving equipment. It was often necessary to "cash in" on grain rather than to buy good sires. This is the reason which dairy and beef producers have made in the form of Victory Bonds should provide an opportunity to purchase better sires... bring about other improvements in their production program.

Improvement in the meat and new

Funny World

A discharged soldier dashed madly across the dock towards the ferry, the boat's metallic lead crashing into the three foot of water and crushed him to the deck. "Whoosh!" he exclaimed when he had gotten his breath. "I made it after all." "Made what?" asked one of the deckhands dubiously. "This boat's just coming in!"

"It's love that makes the world go round, but so will a good swallow of tobacco juice."

At a recent shipyard launching, the woman who was christen the boat was quite nervous. "Do you have any questions?" "Yes," replied the shipyard manager just before the ceremony. "Yes," ("replied modestly). "How hard do I have to hit it to knock it into the water?"

The husband who knows where his wife keeps her nickels has nothing to do with the husband who knows where the maid's quarters are.

"Darling," he cried in tender tones, "I'm never loved but thee." "Ties we must part," the maiden said, "N'astume for me."

Huge barrage balloons provided a protective umbrella over London and other British cities during the war years. They will continue to give protection against air raids, but instead of against bombs. The "demobilized elephants" are now being made into raincoats for British aviators.

India is now Canada's third customer. During the war the value of Indo-Canadian trade increased 19 times.

R.C.A.F. personnel consulting figures show that only one percent of R.C.A.F. personnel want to be aviators in a commercial capacity.

By virtue of her important position as a key producer of manufactured goods and food for United Nations Canada was the only one accorded membership with the United States in the Combined Production Resources Board and the Combined Food Board. These agencies will co-ordinate the distribution of plant, machinery, products and raw materials throughout the world. They will also glorify the world. They will continue operating until present world shortages of many essentials ease up.

A prosperous rural population which demands a community centre may be established in business, educational, religious and entertainment facilities. Where these flourish and are active it is safe to surmise that the people in that section realize and appreciate the value to them of such a centre. The towns are largely

Seed Testing Service

In accordance with a promise privately two years ago Line Elevators Farm Service now offers a complete seed testing service to growers of wheat, oats, barley, rye and flax. Examinations and testing of seeds will include consideration of five important factors:

1. Germination. Tests will be made to determine viability.

2. Weight. Seeds. The presence of noxious weed seeds will be reported on request.

3. Smuts. All wheat samples will be tested for smut. Testing must and cost will be made on oats, barley, rye and flax. Reports will include recommendations as to treatment.

4. Other Diseases. As samples are removed from the germinators, they will be examined for the presence of other diseases.

5. Mechanical Damage to the seed will be determined since it has an important bearing on the market value of the seed.

Farmers should instruct elevators agents as to which tests are required.

Samples must be sent to a grower or to a local elevator. Line Elevators agents will provide envelopes and send the samples in to Line Elevators Farm Service, Winnipeg.

maintained by the surrounding districts. But the organization, the direction, and to a great measure the up keep, of the institutions in such towns as are in the hands of the business interests, together with those directly and indirectly connected therewith.
